

HIGHLIGHTS:

Heating System:
Oil Fired Bosch
Boiler

Savings:
18%-22%

Install Date:
2007

Results:

- SIGNIFICANT ENERGY SAVINGS
- RADIATORS HOTTER
- REDUCTION IN THERMOSTAT
- NO MORE BLEEDING RADIATORS

INTRODUCTION

This is a four bedroom 3,800 sq foot detached built in 2000. The owner installed the Tadpole in 2007 as oil was on the rise and their energy usage was also increasing. Prior to fitting the tadpole the owner was using 100 litres of oil per week on average and an annual purchase of 5,000 plus litres per year.

RESULTS ACHIEVED WITH TADPOLE INSTALLED

Since fitting the tadpole this has decreased to between 3,900 and 4,105 over the last 2 years showing a saving of 18%-22%. In addition to these fuel savings a troublesome radiator that needed bleeding almost every week has not been touched for 2 years.
